Letter of Recommendation  
Gaia Energy Systems

North Coast Energy Services contracted with Gaia Energy Systems for the installation of photovoltaic systems on 50 homes through the Solar For All California Low Income Housing Grant Program.

Gaia was not only responsible for the installations but also the necessary rebate and interconnection paperwork. The company's commitment to excellence was evident in the quality of their installations as well as their interaction with customers. The project was completed within the required time frame and in a professional manner.

It was a pleasure working with the entire staff at Gaia Energy Systems. They are a competent, well established company that I would recommend without hesitation.

Sincerely,

Linda McQueen

North Coast Energy Services
