To whom it may concern,

The US Army Corps of Engineers was fortunate to work with Kate Collins and her team at Gaia Energy Systems installing a solar array at the Lake Mendocino Project Office. Gaia coordinated extremely well with other contractors, PG&E and park staff to keep the project on schedule. Gaia was quick to respond to phone calls, e-mails and various requests for information. I highly recommend Gaia for your solar system needs and appreciate their professionalism.

A handwritten signature in cursive script that reads "Kevin Heape".
